REKLAMASI 填海工程

Dredging

Coal-powered power station port facility dredging. The dredging process is used to maintain the depth of the port facility. The dredging process can then be used to produce low-rank coal as steam which can then drive turbines and produce mechanical energy for the generator process into electrical energy.

Reclamation

Pantai Timur Ancol Development Reclamation. The reclamation process is used to create new land area with the hope of becoming a contribution beach to use as a vacation for the people of Jakarta.
