

Guangfulin Relics Park in Songjiang New City

in each grade, according to Zhang Lei, principal of Songjiang Future Experimental School.

According to its plan this year, the school has completed enrollments for one class each in the first and sixth grades, and will open in September.

For medical services, in the south Songjiang campus of Shanghai General Hospital, the second phase of its expansion project is stepping up construction.

The project involves the addition of an inpatient building, an outpatient medical technology building, a research building and a fever clinic, with a new total construction area of nearly 159,000 square meters and accommodation for 600 hospital beds.

After completion, the project will directly answer the medical needs of Songjiang New City and the southwest of Shanghai.

## Fengxian New City

Fengxian New City is to focus more on the development of innovation, digitalization, consumption, and culture and creative industries.

Shanghai Electric Group founded Shanghai Electric New Energy Development Co in Fengxian, with a registered capital of 3 billion yuan. It serves as a unified functional platform to support the group's new-energy development and independent technology innovation. It is also a support platform for the group to develop the new-energy equipment industry and independent technology innovation.

The main focus of the new company will be on smart energy, smart manufacturing and smart infrastructure, according to Chen Haiying, deputy director of Fengxian District's development and reform commission.

A bird's-eye view of Jiading New City

The construction and development of new-energy projects on integrated energy and distributed energy, together with the energy-saving transformation of parks in the district, will help Fengxian build an ecological area and accelerate the progress of carbon peaking and carbon neutrality, Chen said.

As another major project in Fengxian, a new branch of the Shanghai Art Museum, its first branch since its establishment 66 years ago, will be set up in a cultural center in Fengxian.

Asia's largest spot gas trading platform. Up to now, the number of its domestic and foreign member enterprises has exceeded 3,300.

"The exchange will develop international business, achieve innovation and breakthroughs, and make every effort to serve Shanghai's aim of building an international petroleum and gas trading and pricing center," said Ye Guobiao, chairman of the exchange.

Meanwhile, more high-quality education resources will be introduced into Nanhui New City. During the 14th Five-Year (2021-2025) Plan period, the area will join hands with a number of universities to set up basic education schools.

Among the key projects, a Lingang campus of the No. 2 High School of East China Normal University will be built in Nanhui. Construction started at the beginning of the year and the school is expected to open in September next year.

The area is also optimizing its education development system, setting up research institutes, universities for the elderly and activity centers for teenagers, said Fang Juan, deputy director of the social development department of Lingang Special Area Administrative Committee.

## Nanhui New City

The Shanghai Petroleum and Gas Exchange has been one of the major projects in Nanhui New City. The exchange is a national energy-trading platform under direct guidance of the National Development and Reform Commission and the National Energy Administration.

In 2021, it recorded a trading volume of 81.663 billion cubic meters of bilateral gas, maintaining its position as
